

THE VEER Careers Institute

THE VEER Careers Institute seeks to help close the gap between industry and academia by adequately grooming college students and graduate job seekers with the right employability (or entrepreneurship) skills towards faster job placements, locally and globally.

*The Concept seeks to take over the under of all large bridges in all major cities in the country and to transform the underneath of those bridges into Business Enclaves of their own classes where employability skills as well as entrepreneurial skills will be shaped for candidates (especially the **HELMET Smart Insurance policy holders**) towards faster job placements with the Corporate World, locally and globally.*

THE BRIDGE BUSINESS ENCLAVE

Airport Hills Overpass

Employability skills development for students (*High School and College*), national service personnel and graduate job seekers → **soft skills**, **hard skills** and **industry competencies grooming** to help job seekers to easily bridge the gap between careers placement skill-sets (also known as **onboarding skill-sets**) and already acquired **academic skill-sets**.
